- lawand02

SKILLS

- Leadership
- Communication
- Problem Solving
- Team Collaboration
- Critical Thinking
- Adaptability
- Time Management
- Continuous Learning
- Creativity

PROGRAMMING LANGUAGE

- C++
- PHP - Laravel Framework
- Python - Django Framework
- C
- JavaScript
- TypeScript

LANGUAGES

- Kurdish — Native
- Arabic — Very Good
- English — Very Good
- German — Beginner

PROFESSIONAL SUMMARY

Multidisciplinary engineer with expertise in full-stack web development, embedded systems, and graphic design. Proficient in Laravel, Django, and React for building scalable applications, alongside hands-on experience in PCB design, FPGA development, and robotics. Combines technical depth with creative design skills to deliver complete, production-ready solutions

WORK EXPERIENCE

Rojava TV

2020 - 2022

Graphic Designer & Montage Programme Section

- Designed compelling graphics for broadcast and digital platforms, ensuring high visual impact.
- Collaborated with the production team to create engaging montage videos that enhanced viewer experience

Acorn Associated Company

2022 - 2024

Software Engineer

- Engineer and maintain scalable web applications using PHP and Laravel, serving the operational needs of an engineering and logistics NGO.
- Design and develop RESTful APIs, enabling seamless integration between frontend systems and backend services.
- Architect relational database schemas in MySQL, optimizing queries and reducing page load times by 30%.
- Implement robust authentication and role-based authorization systems, ensuring data security and access control.
- Collaborate with frontend developers to integrate user-facing components, improving development velocity through clear API documentation and code reviews.
- Diagnose and resolve production bugs, perform performance profiling, and deploy patches to improve application reliability and maintainability.

Freelance Embedded Systems Developer

2024- 2025

- Designed embedded firmware for Arduino, ESP32, and Raspberry Pi platforms delivering custom IoT and robotics solutions for clients.
- Created PCB schematics and layouts using Altium Designer, including IR sensor and sound detection circuits.
- Programmed sensor integration, serial communication protocols, and motor control algorithms for autonomous robotic systems.

Freelance Graphic Designer

2024 - PRESENT

- Delivered branding, logo design, social media graphics, and motion graphics for diverse clients.
- Created UI mockups and visual assets using Figma, Photoshop, and Illustrator.

EDUCATION

Rojava University

2019 - 2022

Higher Institute of Mechatronics

- Relevant coursework: Software Engineering, Embedded Systems, Electronics, Automation, Programming (C/C++), Digital Logic Design, Computer Architecture, Industrial Design, Control Systems

TECHNICAL SKILLS

Core Competencies: Software Engineering, Programming, Web Development, Embedded Systems, PCB Design, Graphic Design, Video Montage, Industrial Drawing

Languages: PHP, Python, JavaScript, TypeScript, C, C++, VHDL, Verilog, SQL, HTML5, CSS3

Frameworks & Libraries: Laravel, Django, React, Next.js, Bootstrap, Tailwind CSS, REST API, OpenCV, TensorFlow

Databases & Cloud: MySQL, PostgreSQL, SQLite, Docker

Tools & Platforms: Git, GitHub, VS Code, Arduino IDE, PlatformIO, Linux, Figma, Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Altium Designer, MATLAB, SolidWorks, ModelSim, Xilinx Vivado

Embedded Systems & Hardware: Arduino (Mega/Uno), ESP32, STM32, Raspberry Pi, Sensors, Serial Communication, Servo Motors, PCA9685, Bluetooth HC-05, PCB Design, Digital Logic, FPGA

Software Engineering Practices: OOP, MVC Architecture, RESTful API Development, Authentication & Authorization, Database Design & Migration, Debugging, Performance Optimization, Code Review, Version Control (Git), Testing

Design & Multimedia: Graphic Design, Video Montage, Video Editing, Motion Graphics, Branding, UI/UX Design, Broadcast Graphics, Industrial Drawing
